

# Nishant Mogha

## Software Developer

I am a passionate software developer with a strong background in full-stack development. I specialize in creating seamless UX and elegant UIs for web and mobile platform. I like to learn, create and share my knowledge about software development in general.

## Experience

**Associate Software Engineer Intern** | Apr 2022 - Aug 2022

OneIoT (Formerly Firewires Solutions)

As a front-end **React** developer my main responsibilities were to:

- Help redevelop the main user facing portal with new design and best practices.
- Suggest & build modern designs for UI components in **Figma**.
- Co-ordinate with back-end engineers to test & implement new features for the portal.

## Projects

### Fashion E-commerce Store

[fashion-store.pages.dev](https://fashion-store.pages.dev)

A complete fashion e-commerce store with MERN stack from scratch. Includes user auth with JWT, shopping cart with checkout and payment functionality via Stripe, order tracking, etc.

### Trello Board

[trelloboard.pages.dev](https://trelloboard.pages.dev)

A Trelloboard to help manage and visualize your project workload and progress. I built this to practice my Typescript skills and picked up React Beautiful DnD along the way.

### Code Screenshot

[code-ss.pages.dev](https://code-ss.pages.dev)

A fully functional Ray.so clone (a powerful tool for sharing code snippets) built using React with Tailwind CSS + shadCN UI. I ended up adding additional features on top of it.
